

ID	Epic	As a/an...	i want to...	so that...	MVP [Y/N]	P [L/M/H]	T-Shirt [S/M/L/XL]	Notes
1	Manage pipeline	Developer	create a pipeline with a name, project and platform	I can create a pipeline configuration and train ML models	Y	H	M	
2	Manage pipeline	Developer	see the status of a pipeline	I know if a pipeline works or not	Y	L	S	
3	Manage pipeline	Developer	switch between platforms	I am not vendor-locked in	N	H	L	
4	Ingest server	Developer	see the status of the ingest server	I know if the ingest server is available and works correctly	N		S	
5	Ingest server	Developer	upload data from an application to the ingest server with specification on how it's saved	I can use the data in a dataset when a new ML model is being trained	N		M	
6	Model deployment server	Developer	see the status of the model deployment server	I know if the model deployment server is available and works correctly	N		S	
7	Model deployment server	Developer	get a prediction from the model deployment server via an endpoint	I can use a ML model without downloading it and using it locally	N		M	
8	Datasets/artifacts storage bucket	Developer	upload datasets	I can use the dataset when training ML models	Y	H	M	
9	Datasets/artifacts storage bucket	Developer	download datasets	I can experiment locally	Y	L	S	
10	Datasets/artifacts storage bucket	Developer	download dataset artifacts	I can experiment and debug locally	Y	L	S	
11	Datasets/artifacts storage bucket	Developer	download model artifacts	I can use a ML model offline	Y	M	S	
12	Pipeline configuration	Developer	configure the input, action and output of a step	I can use this step in the pipeline	Y	H	XL	
13	Pipeline configuration	Developer	be warned with detailed explanation if the configuration is invalid	I can correct the errors	N		M	
14	Pipeline runs	Developer	see the steps that have been performed in a run	I know what the MLPA did	N	H	XL	
15	Pipeline runs	Developer	see the output a step might have generated	I can see the analysis of datasets and models in a run	N	H	L	
16	Pipeline runs	Developer	start a pipeline run	I can train a model	Y	H	L	
17	Platform management	Developer	save platform keys or pats	I can access resources in platforms when using pipelines	N		S
